

DATA CENTRE

A Higher Standard of Service

One of the most important decisions you will make is where to house your IT systems. But it is not just about the numbers. How easily can you access your racks? Can you get someone to reboot your server or change a tape in a timely and inexpensive way?

MORE THAN A DATA CENTRE

At Interactive we go beyond the data centre to offer you a superior customer experience. Our data centres are staffed 24x7 with highly skilled engineers and technicians. Our Remote Hands services provide customers with a wide range of support including activities such as: tape changes, cabling, system additions and removals, to operating and managing your IT infrastructure.

FLEXIBLE DENSITY

Racks can be provided individually or in groups. A standard power per rack is 2kW to 6kW, high density up to 21kW and the ability to provision an even higher density solution if required.

FAST FACTS

- Cloud connected to all major public cloud providers
- Nine data centres available across Melbourne, Sydney and Brisbane
- Instant access to Australia's largest hardware engineering capability
- Multi-site solutions available
- High Density options
- PCI DSS compliant
- ISO 9001 and ISO 27001 certified

1800 INTERACTIVE

Their engineering team was faultless and, with them on hand, we were able to free up valuable resources and time for other jobs. Without Interactive, we would have needed to hire staff for the physical moving and facilities side of the project.

Flight Centre

CLOUD CONNECTED

With multiple, redundant communication providers we are carrier neutral and have connectivity to all major data centre and public cloud providers.

INTERACTIVE SERVICE STACK

We have a portfolio of services available to our customers giving you flexibility and choice through your IT journey. As Australia's largest multi-vendor hardware maintenance provider, we can support your hardware within our data centres. We are the premier provider of Business Continuity services and can house your data and have your backup facility all on the one site. Interactive offers multi-cloud solutions which allow you to select and connect to the best cloud to fit your business needs.

PROTECTION FROM DISASTER

Our data centres are co-located with our industry leading Business Continuity offerings. This means that in a disaster we can support both your systems and your people.

INTERACTIVE PARTNER DATA CENTRES

Partnering with other Data Centre providers gives us additional capabilities. This allows us to rapidly expand and provide geographic diversity for co-location and cloud Data Centre services. A dual site solution reduces risks, while you still experience the superior personal service provided by Interactive.

HIGH EFFICIENCY

Our latest designs utilise aisle containment, close-coupled cooling and high efficiency chillers. This delivers low PUEs without jeopardising availability and reliability. Interactive supports the reduction of Data Centre emissions and utilises the NABERS energy rating tool.

COMPLIANCE FOCUS

Our Data Centres are certified to Australian and International standards, and we are ISO 9001 Quality and ISO 27001 Information Security certified.

EIGHT MILE PLAINS, BRISBANE
