

BUSINESS CONTINUITY

Protection for when you need it most

If keeping your business running is important to you, Interactive can tailor a business continuity solution that protects the things that matter most.

RAPID RECOVERY

Being able to redeploy your people and rapidly recover your critical business systems in the event of a disaster are key goals in any risk management plan. With today's emphasis on corporate governance and compliance, having an effective disaster recovery procedure in place, and tested regularly, is a critical step to good business practice.

DATA CENTRE

With our office recovery facilities backed by data centre redundancy, we can provide multi-subscriber or dedicated IT infrastructure solutions that support individual systems all the way to complete organisation recovery. We can offer a tailored solution that delivers the right return-to-business outcomes.

RISK MANAGEMENT

Interactive uses proprietary software to evaluate every customer requirement and location. Our extensive experience help us to manage and mitigate your risk. Interactive risk assessment considers physical location, historic natural disasters, likely future disasters, power and communication links and staffing volumes to ensure an optimal client mix for our centres and your peace of mind.
