

INTERACTIVE CYBER SECURITY SERVICES

EMAIL THREAT PROTECTION

EMAIL THREAT PROTECTION

INTERACTIVE PROTECTS CUSTOMERS AGAINST EMAIL ATTACKS BY MANAGING THREATS AT AND BEYOND THEIR EMAIL PERIMETER.

When it comes to protecting your business against cyber threats, managing your email security is critical. Having access to your emails keeps your operations running, yet it's also the number one vector for cyber attacks. The dynamic nature of email-borne threats combined with the sheer volume requires a solution that's agile, intelligent and scalable.

The impact of a breach can be devastating, including data loss, clean-up/recovery costs, regulatory fines and reputational damage. You need an effective solution in place that protects your business and your employees anytime and anywhere.

15%

OF DATA BREACHES FROM JULY TO DECEMBER LAST YEAR WERE FROM EMAIL PHISHING ATTACKS

OAIC, 2019

EMAIL THREAT PROTECTION ALLOWS YOU TO:

- Defends against the risk of spear-phishing and advanced email threats
- Blocks spam and viruses received through emails
- Protects employees against impersonation, malware attachments and malicious URLs
- Enables automated email encryption and secure message delivery
- Eliminates the need to manage on-premises email security software and hardware
- Detects and blocks attacks from both external and internal threat actors
- Leverages the cloud to continuously apply the most current email security protections

mimecast[®]

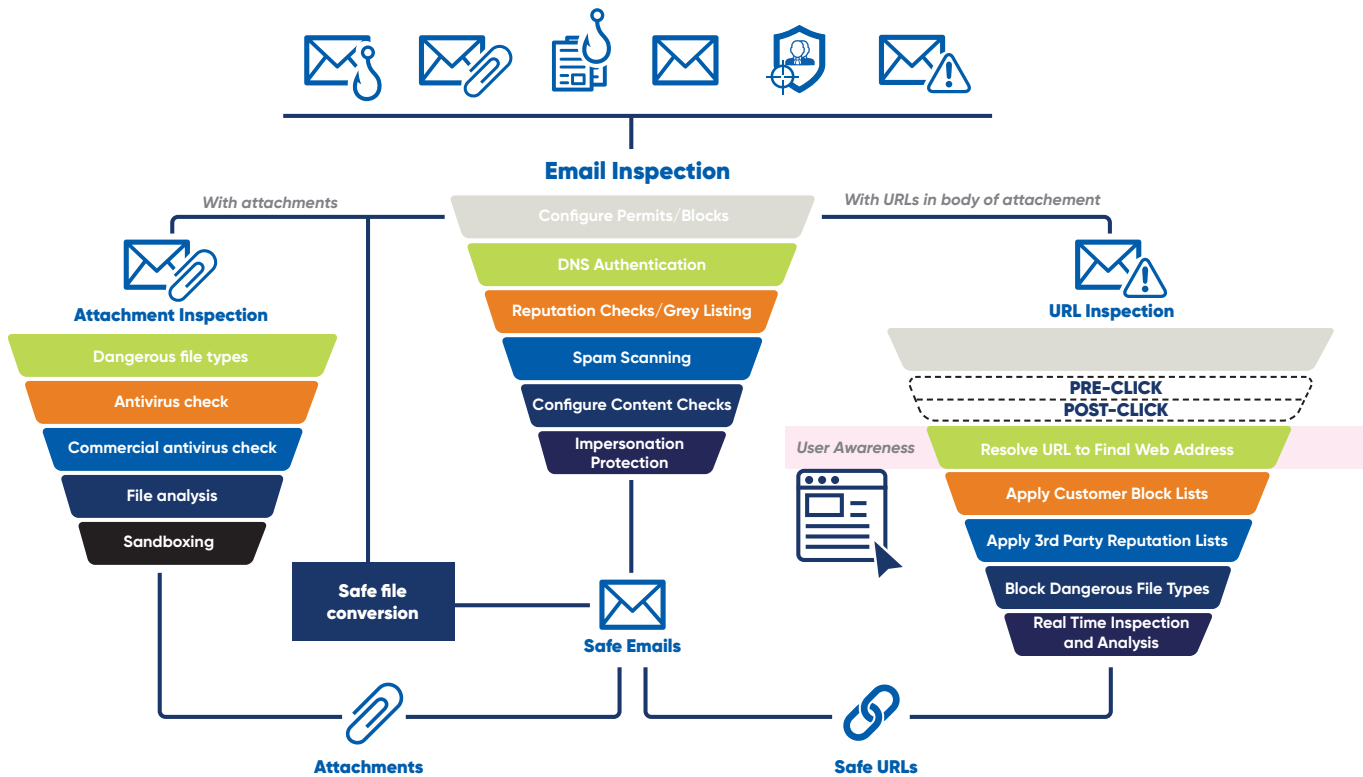

We have a finite budget, so we need to balance spend and capability. Any cost savings we make we can reinvest in other parts of the business.

Tuan Tran, Head of IT, Brightside

PROTECT YOUR BUSINESS FROM EMAIL THREATS

Interactive's Email Threat Protection addresses email threats at your perimeter, inside your business and network and beyond, using specialized methods of inspection.

Let Interactive Email Threat Protection be your first line of defence against email borne cyber-attacks.
