

DATA CENTRE CARE

Considering the Management of Your Data Centre?

With IT budgets shrinking, many companies are looking to reduce their infrastructure complexity and find more efficient ways to manage their data centres.

Do you have the expertise to run your internal data centre optimally?

EXPERTISE

With demands on the data centre growing and physical space declining, there are immediate benefits to be gained from a new approach to data centre management. For companies who need to retain their internal data rooms and private data centres, having access to dedicated expertise is key to delivering optimal performance while containing costs. Choosing a managed service provider enables you to retain your private data centre or server room while still benefitting from the knowledge, scale and expertise of our data centre team.

Some of the key benefits of outsourcing management of your data centre are:

- Increased efficiencies and cost savings
- Frees up time and resources to focus on core business priorities
- Gain access to experienced data centre engineers
- Peace of mind that you have experts managing your data
- Utilise remote monitoring solutions with real-time alerts to reduce risk

Interactive has the Experience and Experts

EXPERIENCE

Interactive has owned and managed data centres for over 20 years. We have a proven track record of delivering high-availability data centre operations. Our team can provide our operational experience, design capability, industry knowledge and buying strength to ensure you have an efficient, reliable and effective data centre that can respond to your changing business requirements.

ADAPTABILITY

From just a few racks to hundreds, Interactive can handle all the complexities that owning a data centre entails. From procurement, upgrades, managing plant and equipment through to managing existing supplier contracts, Interactive can take care of it all. Our team of exceptional data centre experts go beyond the traditional management of your facility, we bring our extensive operational experience to ensure your environment is running optimally 24x7—all within your four walls.

SECURITY

From data centre design and audit through to ongoing equipment maintenance and monitoring, we offer a professional outsourced solution freeing your IT staff to work on your core business priorities. We can analyse your data centre for deficiencies or improvement opportunities and manage any required upgrade works. Interactive holds ISO 9001 and ISO 27001 (data security) certifications, ensuring security of your data and equipment, plus we utilise an ITIL-based service delivery methodology for maintenance, change and incident management.

EFFICIENCY

We are already monitoring a wide range of data centre environments and have the tools and knowledge to respond to even the most complex of issues. Our monitoring service automatically detects infrastructure or plant issues including temperature, noise, smoke or fire and responds accordingly. If an on-site staff presence is preferred, our team can work on a rostered or full-time basis as required, giving you hands-on skills and expertise without the management overhead.

Our services are designed for every stage of your IT lifecycle
